- |                 |                  |
|-----------------|------------------|
| – DevTools      | – BlueStacks     |
| – SoapUI        | – JIRA           |
| – Postman       | – Trello         |
| – Jmeter        | – Openserver     |
| – Fiddler       | – Android Studio |
| – Charles proxy | – Selenium IDE   |
| – GitHub        | – TestRail       |

**ABOUT ME**

I want to work in a modern company, with modern views on the organization of work, where I can fully realize myself and develop in the necessary for the company and interesting to me direction without formalism and unnecessary bureaucracy.

My soft skills:

- high responsibility;
- punctuality;
- attention to work, including documentation;
- Good communication with people of all ages and positions.

I am already actively learning English, and in the future I plan to improve the existing and acquire new professional skills.
